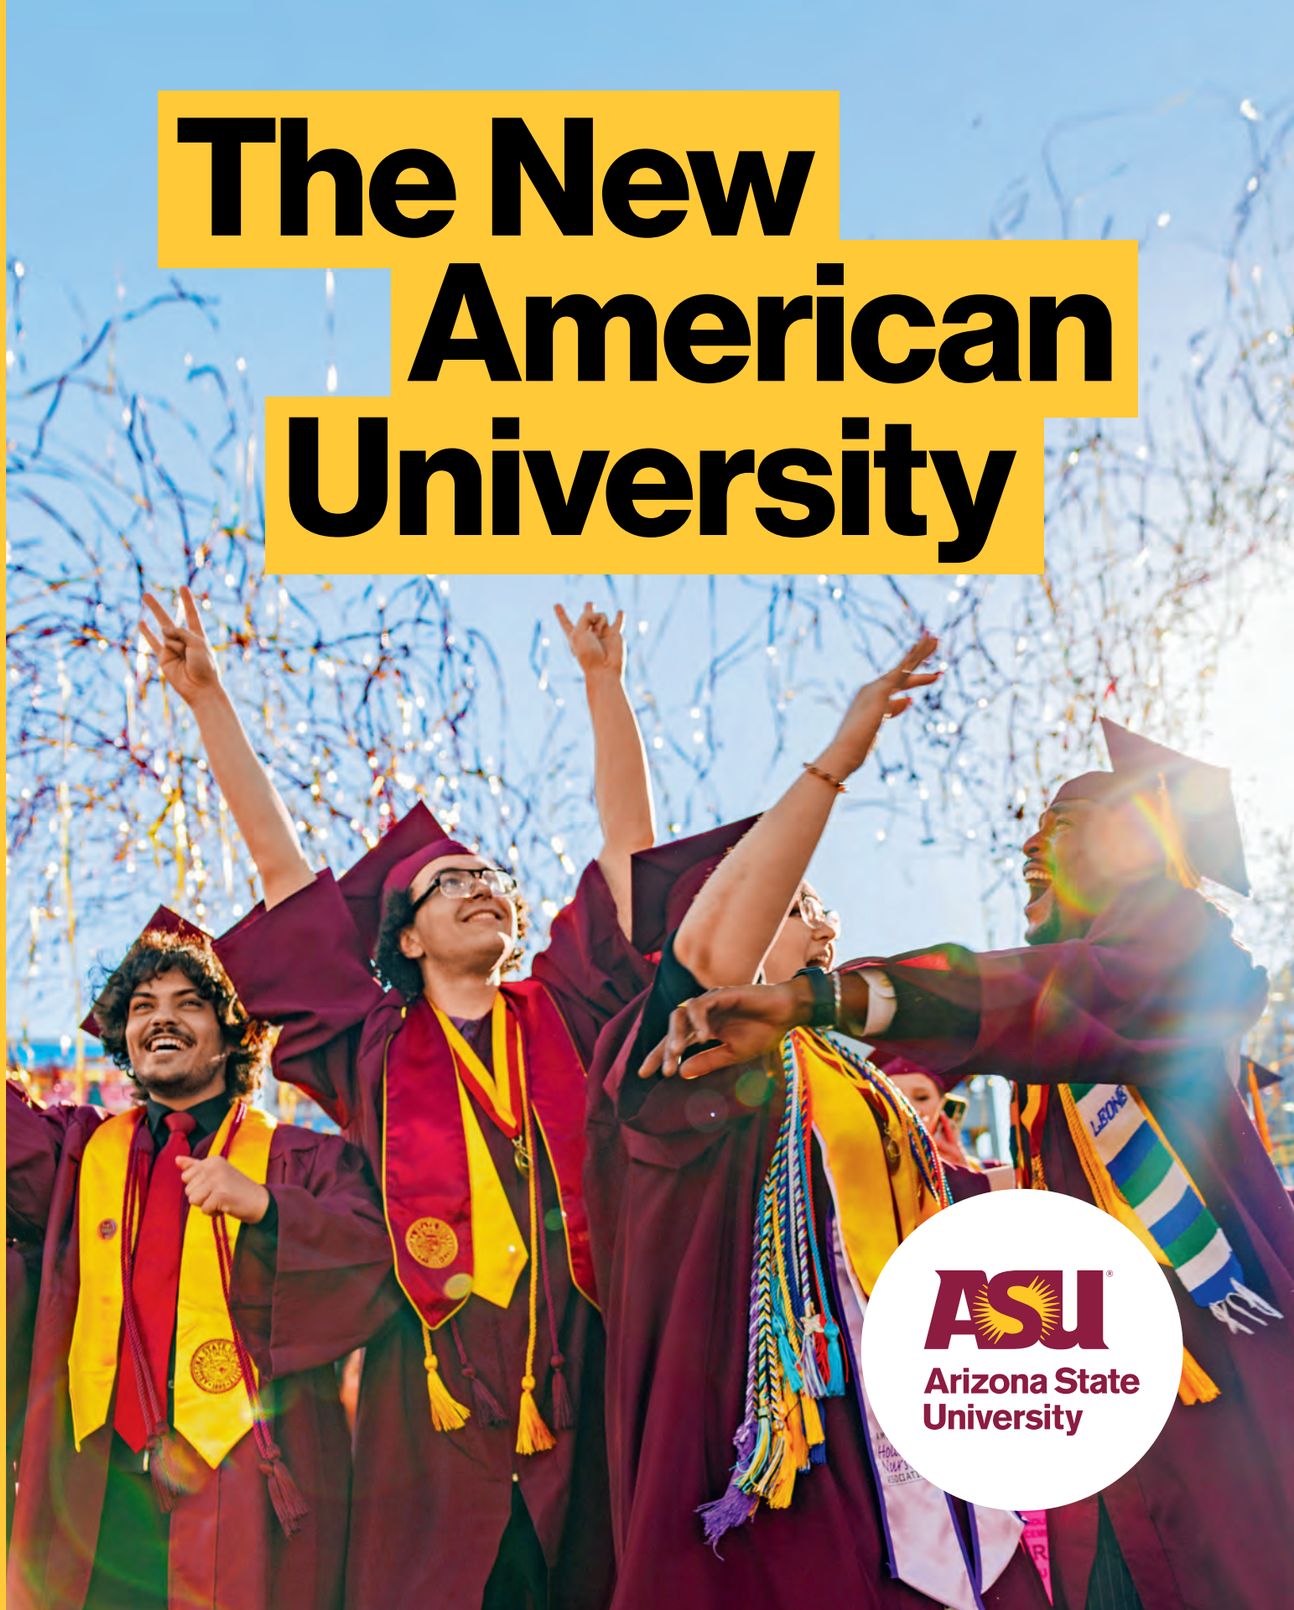
The New American University



Elevate your future

What happens when a university with a global reputation for **academic excellence** opens its doors to every student eager to learn? You get a worldwide demand for an ASU degree, reflected in record enrollments and top rankings.

ASU is one of the **largest and most impactful communities of students and experts in the world**. We're constantly creating new degree programs, pioneering innovative learning methods, and building welcoming spaces that foster growth and discovery. And because it offers an exceptional value and high return on investment, an ASU education is a **smart financial decision**.

With campuses of every size, in-person and online courses, and thousands of opportunities and experiences, ASU offers **more ways than any other university to customize your education**.

If you're driven to explore your potential, gain new skills and make a meaningful contribution to the world, **you belong here**.

01. Experience an academic powerhouse **4**

02. Customize your college journey **20**

03. Make a difference in your life and in the world **40**

01.

Experience an academic

power house

You'll have a superior academic experience at ASU led by faculty who aren't just professors — they're **mentors** who are passionate about their subjects and **leaders in their fields**. And many of them have been recognized with prestigious national and international awards.

You'll also learn from the most current teaching practices and have opportunities to apply that knowledge through **interactive field-based learning** and **undergraduate research opportunities**.

This powerful combination creates a **transformative academic experience** worth your time and investment.

"The relationships that you make with people make you who you are."

– Nikhil D.
Senior Director, Business Development
Metsera in New York City

ASU alum Nikhil D. sits down with his mentor, Professor Ramon Velazquez — whose research focuses on identifying new therapeutic targets for neurodegenerative disorders — to talk about how valuable it is for students to have a mentor. The two had their research on Alzheimer's disease published in a prestigious scientific journal. At ASU, you'll develop impactful connections with professors, staff members, researchers, club leaders, colleagues and others who can become your mentors during your college experience and beyond. See Nikhil and Professor Velazquez's discussion and other Golden Conversations about the authentic experiences ASU students are having.

asu.edu/golden

What does it mean to go to the school that's repeatedly ranked No. 1?

Over the past three years, ASU has placed **No. 1 on more than 30 rankings lists**, including the best in innovation, sustainability and global impact.

ASU's consistent No. 1 rankings mean you can count on us to offer a **superior university experience**, now and into the future. You'll be equipped to master your field of study and graduate highly prepared for the next step in your life.

Additionally, as a student, you can be an **important contributor** to some of our most innovative and impactful projects.

Top 10 worldwide for U.S. utility patents

ASU was again named a top 10 world university for U.S. utility patents issued in 2025 — along with MIT and Stanford — highlighting the impact the university is making through new ideas and solutions.

A leader in the semiconductor revolution

Students are becoming prepared for the critical semiconductor industry, while ASU is helping to add more jobs and strengthen the economy by providing research, education, innovation and talent for the industry.

Using AI to advance medicine

ASU researchers are harnessing the power of artificial intelligence to speed up diagnosis, reveal new treatments and discover information about our health.

Improving coral reef health

ASU researchers studying coral reefs in Hawai'i found that human impact is negatively affecting coral reef health, and they are providing solutions to restore the health of these important reefs.

Repeatedly ranked

innovation
ASU ahead of MIT and Stanford
— U.S. News & World Report, 11 years, 2016–26

sustainability
ASU ahead of Stanford and UC Berkeley
— Association for the Advancement of Sustainability in Higher Education, 3 years, 2023–25

global impact
ASU ahead of MIT and Penn State
— Times Higher Education, 6 years, 2020–25

#1

30+ lists
in the last 3 years

A commitment to reducing our carbon footprint

ASU is one of just a handful of universities in the U.S. (and only 17 worldwide) to have achieved net zero greenhouse gas emissions. The net zero goal was reached six years ahead of our target.

Influential business research

Ranked No. 17 in the world for business school research by the Financial Times Business Education Research Insights report, the W. P. Carey School of Business is recognized for innovative, high-impact scholarship.

First-of-its-kind X-ray instrument begins blazing trails

ASU has opened a new chapter in X-ray science with a pioneering instrument that will help scientists see deeper into matter and potentially make advances in renewable energy, drug discovery, and computing and information science.

Revolutionary plastics recycling microfactory to divert waste

An ASU partnership has created a plastics recycling microfactory that is turning plastic waste into usable products and diverting 550 tons of plastic from landfills each year.

Innovating with purpose

ASU practices Principled Innovation®, which considers the well-being of humanity before creating new innovations, putting character and values at the center of actions.

Creating innovative rapid blood testing methods that can better detect hundreds of diseases

ASU researchers developed a blood test that can look at hundreds of disease markers. This advancement could lead to better tracking of infectious disease outbreaks, help create new vaccines and improve patient treatments.

ASU is pushing higher education boundaries

ASU is creating **innovative ways to learn** by shifting how biology is taught through a new framework called NeoBio.

Founded on two main principles, NeoBio immerses students in a virtual reality lab, Dreamscape Learn, that uses powerful technology and gripping storytelling to teach concepts. Dreamscape Learn has been shown to help students retain more information and **raise their grades by a full letter**.

Next, NeoBio enhances the conventional textbook-and-lecture style of teaching by introducing additional adaptive learning tools, creating a more **student-tailored learning experience**.

Biology is just the beginning: Neo-style learning is now being used in astronomy, art history, chemistry and sustainability courses.

"You're not just learning the material, **you're part of the material, part of the story, part of the exploration.**"

Alysha H.
Senior research assistant

"I felt like a true scientist when I was in there."

Michelle V.
ASU student

Study with some of the world's most brilliant minds

From day one, ASU students have the opportunity to learn alongside professors and researchers as they explore innovative ideas and make groundbreaking discoveries. **400+ prestigious faculty members have been honored by the National Academies**. These academic mentors — including Nobel laureates and other distinguished experts — are shaping their fields and inspiring their students, who are also making a difference and achieving remarkable success.

ASU's faculty includes recipients of the world's most prestigious awards, fellowships and honors.

Nobel laureates

- Transforming the art of storytelling through film. – Professor of Practice Murrieta

Learn to think creatively

Creativity is the most in-demand skill for more than 70% of employers. Taking a class or majoring in programs such as art, design, digital culture, music, dance, film or theatre can help you hone your creative-thinking and problem-solving skills so you're **better prepared for taking on challenges**, big and small.

Graduate alum Jialong Xu shows off his Points, Lines and Planes project for Weidi Zhang's Designing Emerging Media Art Installations class during the fall 2024 MIXibition.

The MIX Center facilities in downtown Mesa support the production of a wide variety of media — from blockbuster superhero movies to virtual reality video games — enabling students to gain the skills they need for a digital economy.

The newest addition is Planar virtual production technology, also available at the ASU California Center in LA. The technology was used in "The Mandalorian" and "Dune." Because ASU is one of the only film schools offering this technology, faculty members are helping to set standards for teaching the method.

Take part in conversations that are shaping the national dialogue

ASU partners with business and political leaders and top industry experts to offer students the **opportunity to connect and engage** with different perspectives. Here are some notable figures who have shared their expertise with ASU students.

Tech innovator and creator **will.i.am** is partnering with ASU to design new educational models that better prepare today's learners for the digital economy of tomorrow.

Laurie Leshin, former director of NASA's Jet Propulsion Laboratory, returns to ASU as University Professor for Space Futures.

U.S. Surgeon General **Dr. Vivek Murthy** spoke with students about mental health, resilience and building a healthier society.

Students heard from former Google CEO **Eric Schmidt** about the power of science, technology and hard work.

Hollywood movie producer **Walter Parkes** partnered with ASU to bring students Dreamscape Learn, an immersive VR-based learning experience that all students can participate in.

Former U.S. Secretary of State **Condoleezza Rice** held a discussion with students about being involved at the highest level of international affairs.

Students learned about cybersecurity and privacy at a forum with former U.S. Secretary of Homeland Security **Michael Chertoff**.

Former Intel CEO **Craig Barrett** and former Secretary of the U.S. Air Force **Barbara Barrett** have created opportunities for students to interact with international leaders in Arizona and at ASU's center in Washington, D.C.

Former National Science Foundation director **Sethuraman Panchanathan** returned to ASU to lead the way in making science and tech more accessible.

ASU's law school named its sports law and business program after former Major League Baseball Commissioner **Bud Selig**, who has supported the program since it began.

First female U.S. Supreme Court Justice **Sandra Day O'Connor** inspired ASU to name its law school after her.

Interim Starbucks CEO **Howard Schultz** participated in an ASU town hall event on how business can be a partner in expanding education opportunities.

NPR journalist **Mara Liasson** connected with students about the role of citizens and journalists in national elections.

Sidney Poitier inspired the renaming of ASU's film school, which carries forward his legacy of excellence and social impact.

Former U.S. ambassador to the U.N. and national security advisor **Susan Rice** talked about current global events.

NBA head coach and former basketball player **Steve Kerr** spoke with students about how to be the leader your team needs.

Former Washington Post executive editor and Pulitzer Prize winner **Martin Baron** engaged with students on the role of the news media in advancing free speech.

Former Arizona Governor **Doug Ducey** spoke with students about how serving as governor provides one of the most meaningful opportunities to create positive and lasting change.

Primatologist **Jane Goodall** talked with students about her work with chimpanzees in Africa and the importance of hope in overcoming obstacles.

Senator **John McCain** and **Cindy McCain** partnered with ASU to form an institute to promote character-driven leadership.

While he was president, **Barack Obama** addressed new graduates at an ASU commencement.

Former national security advisor **Robert O'Brien** discussed U.S. foreign policy and America's role in the world.

GoDaddy founder **Bob Parsons** shared his story about how he overcame challenges in his life to become a successful entrepreneur.

Revolutionary artist **James Turrell** partnered with ASU to inspire transdisciplinary approaches to creativity for students.

Businessman, TV personality and former Dallas Mavericks owner **Mark Cuban** joined Ambassador **Jeff Flake** at ASU's **Dialogues for Democracy** speaker series to discuss entrepreneurship, politics and civic engagement, and how artificial intelligence will impact the future of work.

A signature program of the ASU Institute of Politics, Dialogues for Democracy brings nationally recognized thinkers, journalists, business leaders and political experts to campus to share a wide variety of viewpoints on urgent national and international issues and **offers students an opportunity to join important conversations**.

Customize your college journey

Your ASU experience will be unlike anyone else's because you'll have access to opportunities and tools to design a path that matches your interests and ambitions. From where you live and what you study to what you do during your downtime, **you'll be in charge of it all.**

ASU treats students as design partners, giving them the tools to contribute to and even lead some of ASU's most important discoveries and projects. A prime example is the Student Pavilion – students helped design the building and now manage and operate it. **The Student Pavilion embodies the idea that students are central to ASU's strength and success.**

Student associations headquartered in the Student Pavilion

Undergraduate Student Government

ASU Programming and Activities Board

Student Coalitions

The 1,000+
student organizations at ASU also have access to the Pavilion's multiuse event space.

Learn your way

At ASU, you can customize how you learn, what you learn and the pace at which you learn. See all the ways you can **make your academic experience uniquely your own**.

Concurrent degrees
You can earn two degrees in the same time it takes to earn one, expanding your knowledge and career options.

Accelerated bachelor's and master's degrees
You can opt to fast-track your studies by choosing either a 2.5- or 3-year path after admission to an accelerated program. Some programs offer an accelerated master's option, enabling you to earn your bachelor's and master's degrees one year earlier by working toward both simultaneously.

Personalized graduate admission
Continue into an ASU graduate degree program with no need to apply or pay an application fee.

Minors and certificates
Taking classes outside your major through a minor or certificate program will enable you to become more well-rounded and boost your resume.

Semester lengths
Choose a traditional 15-week semester or a more concentrated 7.5-week session. Either way, the course content and credit you earn are the same.

Technology-enhanced learning
Active learning. Listen to class lectures online, then go to class to work on problem-solving in small groups.

Adaptive learning. An interactive style of learning that adjusts to your skill level in real time.

Online learning. Pursue your degree from anywhere as a full-time ASU Online student, or take an online course in addition to your on-campus classes.

Artificial intelligence. Benefit from enhanced learning experiences and personalized support through ASU's innovative use of AI — and explore courses and degree programs that prepare you for careers shaped by AI.

Universal Learner Courses. Take first-year ASU college courses online while you're still in high school or before you enroll at ASU, and pay for credit only if you're happy with the grade. The course credit will count toward your ASU degree.

Immerse yourself in a community that lets you be you

Casa del Valle is the newest residence hall on the West Valley campus and home to Barrett, The Honors College students.

Life in an ASU residence hall isn't dorm life, it's community life. ASU's premier residential colleges are designed for ASU students to live with peers who share similar academic and career interests, and are unlike those at other public universities comparable to ASU.

Residence halls include:

- Comfortable, completely furnished rooms
- Utilities, cable and Wi-Fi
- Full community kitchen
- Group recreation space
- Quiet study areas
- Washers and dryers

95%
of first-year students who live on campus continue on at ASU because living in a residence hall means stronger academic support and connection from day one.

15
residential colleges

50+
campus dining halls, cafes and other places to eat

100+
ASU athletics home games each year

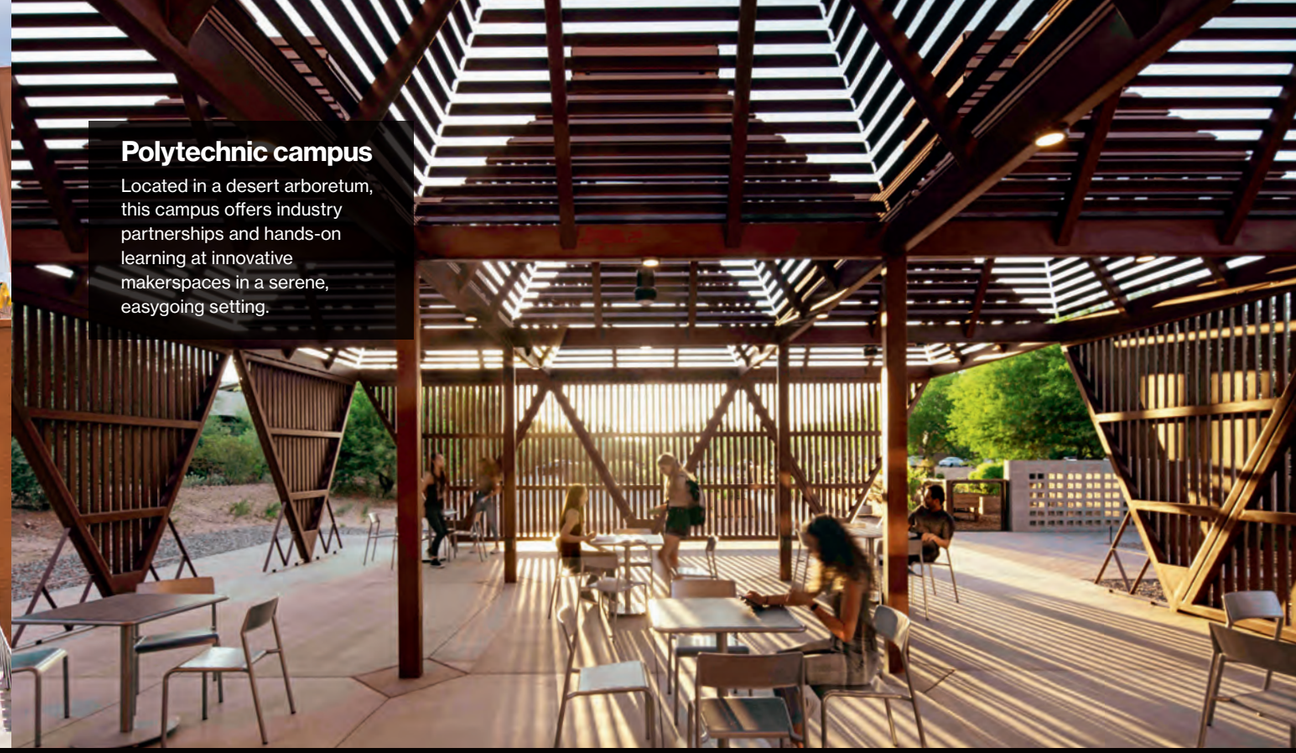
1,000+
student clubs

Benefits of living on campus
First-year students living on campus are right next to everything: libraries, tutoring centers, dining halls, the fitness complex and more. You'll have access to a 24/7 community of support and feel more connected to university resources. Students living on campus also get connections to faculty and staff as well as career resources, in-residence workshops, mentoring, leadership and employment opportunities, and volunteerism and service experiences. Plus, they build skills that lead to career success such as teamwork, critical thinking, networking and leadership.

Eating well on campus
No matter what kind of food you're looking for – vegetarian, vegan, comfort food – you can find it at ASU. Dining halls offer delicious entrees, several meal plan options, convenient hours, access to nutritionists, and lots of space to hang out with friends or get some studying done while you eat.

Downtown Phoenix campus

Situated near health care, journalism, government, public service, arts and other professional connections, this campus offers a big-city feel in a career-focused environment.

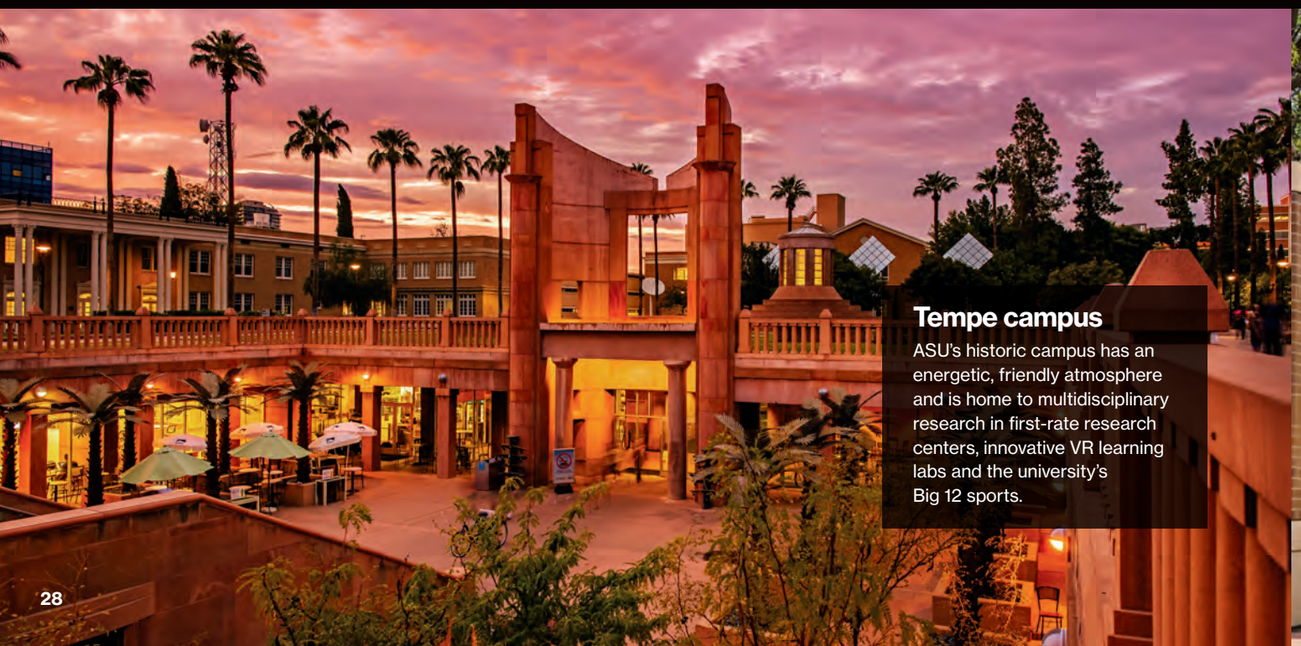


Polytechnic campus

Located in a desert arboretum, this campus offers industry partnerships and hands-on learning at innovative makerspaces in a serene, easygoing setting.

Find the ASU that fits you

Where you learn can be as important as what you learn. ASU offers four campuses in the metro Phoenix area, **each with its own size and feel**, so you're sure to find the one that **fits you best**. Get a feel for the personality of each campus by taking a virtual tour.
links.asu.edu/campuses



Tempe campus

ASU's historic campus has an energetic, friendly atmosphere and is home to multidisciplinary research in first-rate research centers, innovative VR learning labs and the university's Big 12 sports.

West Valley campus

Dotted with beautiful courtyards and fountains, this campus offers a tight-knit community with a peaceful, welcoming vibe and is focused on training the next-generation workforce.

Thrive in a future-focused city

ASU is full of big opportunities for **internships** and **industry alliances**. Going to college in metro Phoenix — one of the fastest-growing cities in the U.S. — puts you close to hospitals, news outlets, the microchip industry, government offices, large corporations and more, all of which (depending on your major) you'll have access to. **These are opportunities you just can't get in smaller cities.**

Discover why **metro Phoenix is America's next high-tech hub** by connecting with industry leaders in semiconductor and advanced manufacturing, aerospace, bioscience, cybersecurity, augmented intelligence, automation and robotics, digital media, virtual and augmented reality, big data, sustainability, and more.

Catch a flight out of Phoenix Sky Harbor International Airport, America's friendliest airport.

Work with ASU and Mayo Clinic researchers as they collaborate on innovative approaches to health care at the Health Futures Center.

Help to create a solar-powered microgrid for use in isolated areas that need electricity.

Intern at one of the dozens of innovative companies at the ASU Research Park, such as the Flexible Display Center, which is advancing flexible display technology.

Be part of the semiconductor revolution by learning to design next-generation microchips at MacroTechnology Works.

Work with Intel and Waymo to develop safer technology for self-driving cars.

Build new virtual worlds, make films, design video games and create other immersive media experiences at the Media and Immersive eXperience (MIX) Center.

Collaborate on an innovative startup with an ASU alum at the SkySong Center.

Train with Amazon Web Services to improve digital experiences for smart-city designers.

Work alongside researchers at the Biodesign Institute and help make discoveries that are improving lives and changing the world.

Conduct biomedical research at the Translational Genomics Research Institute.

Take part in the annual Cybersecurity Challenge and solve problems faced by cyber professionals and digital forensics scientists.

Build spaceflight hardware or collect and analyze data as part of one of dozens of space missions ASU is working on.

Be part of ASU's partnership with local school systems to rethink the traditional classroom model to better impact reading levels and algebra competency.

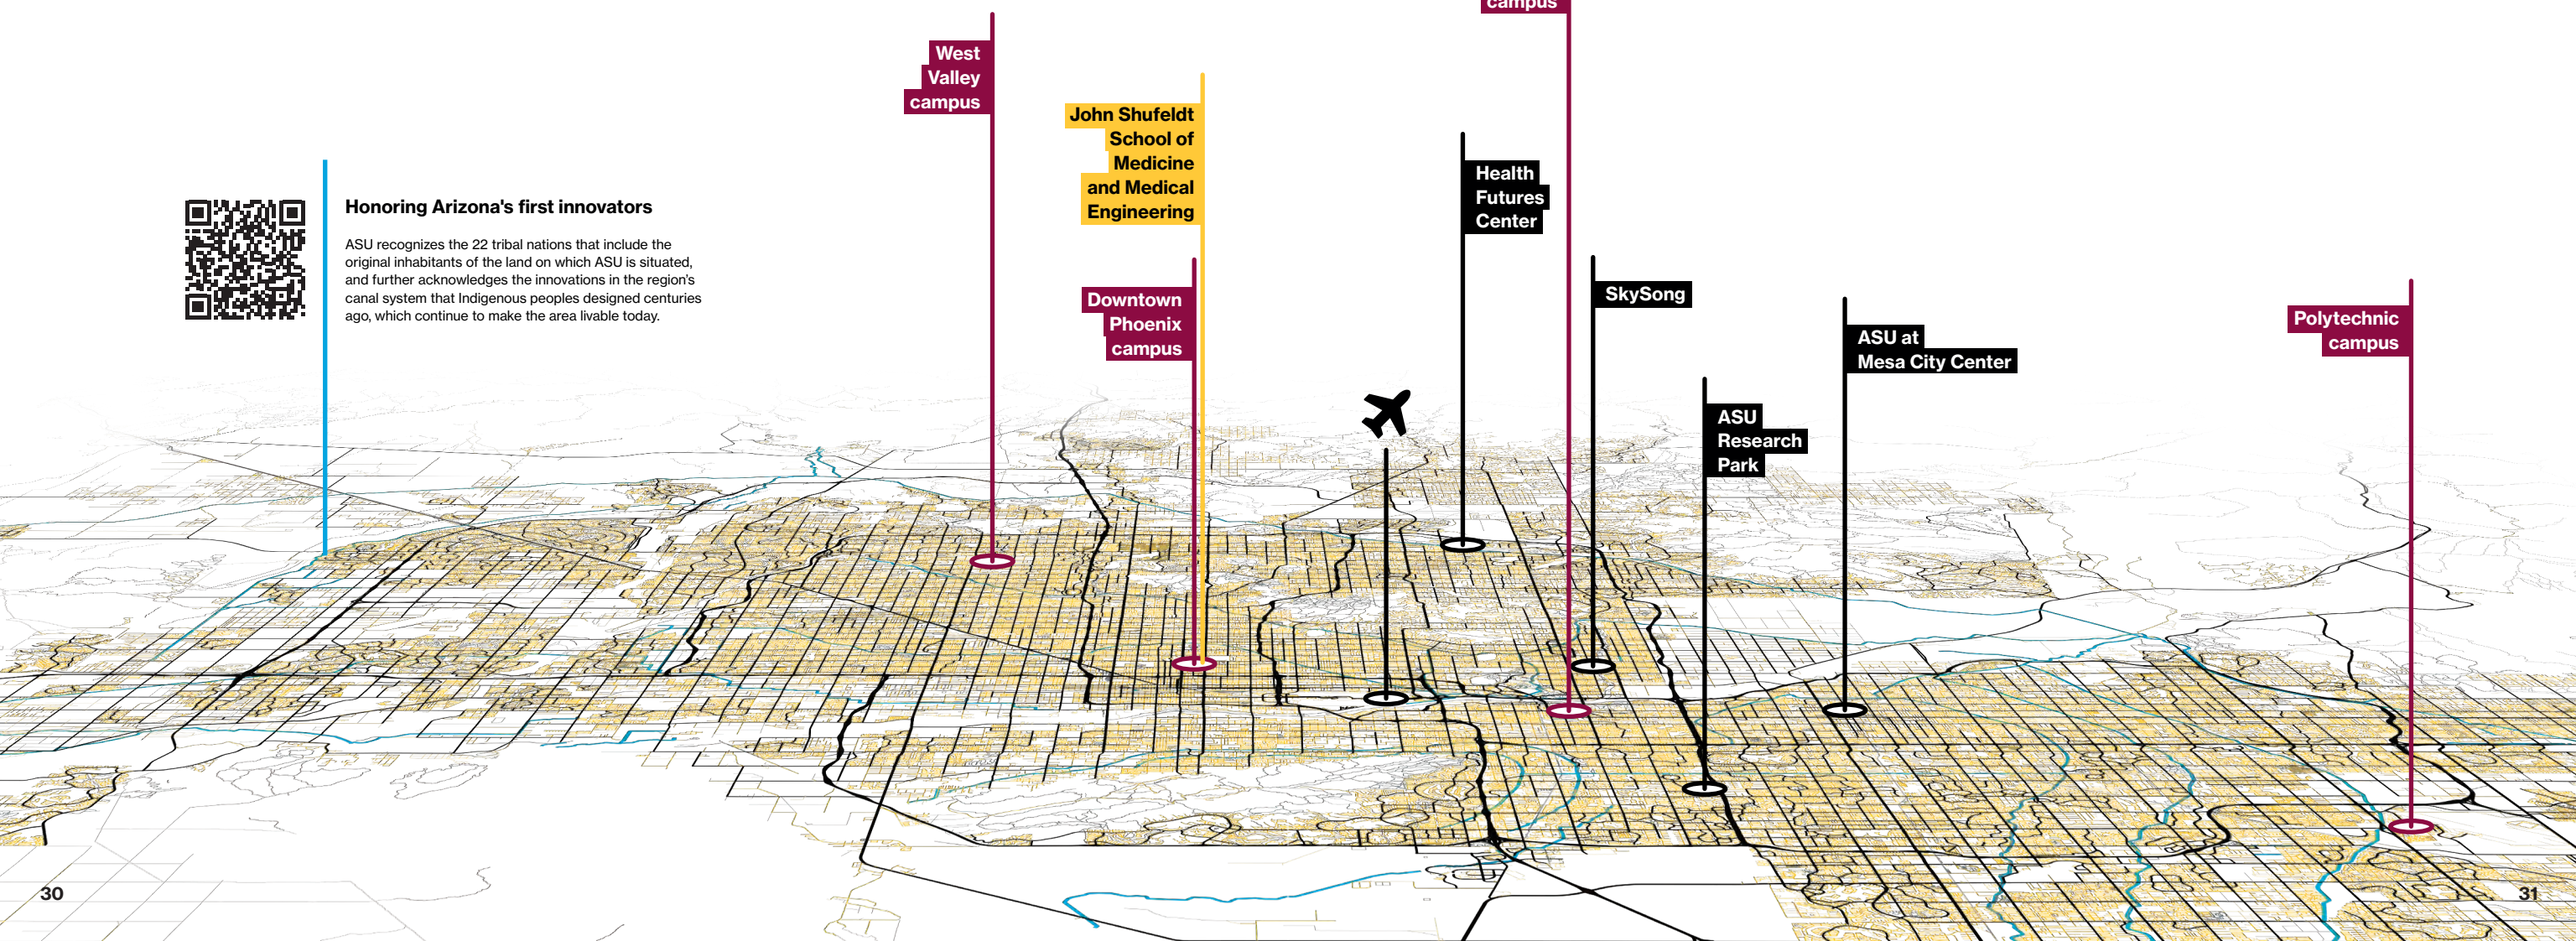
See the inner workings of government by interning for a lawmaker at the state capitol.

Prepare for future industrial growth by working with faculty and industry partners on advanced manufacturing, processes and materials in a Science and Technology Center.

Design microelectronic chips that can simultaneously calculate and communicate data at high speeds in the Center for Wireless Information Systems and Computational Architectures.

Honoring Arizona's first innovators

ASU recognizes the 22 tribal nations that include the original inhabitants of the land on which ASU is situated, and further acknowledges the innovations in the region's canal system that Indigenous peoples designed centuries ago, which continue to make the area livable today.



Earn your degree in a premier global city

ASU continues to grow and ignores the idea of campus borders because we believe in **meeting students where they need to be**. See how we are expanding access to students across the U.S. and around the world.

ASU California Center

Steps from the Fashion District and at the center of the nation's film and television industry, the ASU California Center in downtown Los Angeles offers professional and academic opportunities for students. ASU students immerse themselves in a global hub for creativity and innovation, preparing for careers in film, fashion, virtual reality, law, government, public service, journalism, media and the corporate sector. Student housing is available at Broadway Palace, a luxury apartment building.

ASU in Washington, D.C.

ASU's presence in Washington, D.C., means you'll have opportunities and experiences that can broaden your understanding of national and international issues through interactions with thought leaders and policymakers. You can also earn your degree through ASU Local at ASU's Washington Center.

ASU London

ASU London Centre for Advanced Learning, an independent, U.K.-accredited institution, opens in fall 2026 and will be located in the heart of Islington, central London. Near trendy cafes, live music venues, leafy parks and independent shops, Islington offers the perfect mix of city buzz and community feel. It's one of London's most vibrant student areas. Students at ASU London study computer science, engineering or business management, earning a U.K. degree in just three years before heading to the U.S. to earn their master's degree at ASU.

ASU London is the trading name of ASU London Centre for Advanced Learning, an accredited U.K. degree awarding higher education provider, registered with the Office for Students.

Innovating how and where you learn

There is no such thing as one-size-fits-all learning. While everyone should have access to an education, how that journey looks is different for each person. If learning on an ASU campus doesn't fit your plan, we offer several other **flexible options that may work**.

ASU Local

ASU Local combines in-person learning experiences and personalized support with online coursework to empower student success. Students receive on-site professional coaching within a tight-knit cohort of peers, supported by personalized one-on-one guidance to navigate college and careers. We support students with locations in Los Angeles, Long Beach and Chula Vista, California; Washington, D.C.; Yuma, Arizona; and West Hawai'i.

asu.edu/asulocal

ASU Online

ASU offers more online programs ranked in the top 20 than any other university, without compromising quality. As an online student, you'll learn from the same top-tier faculty and follow the same curriculum as on-campus students. No matter your background, ASU Online provides you with an unmatched online learning experience with research opportunities, hands-on learning, internships and more to empower you to achieve your personal and professional goals.

asu.edu/asuonline

Reinventing science education for online students includes experiences where students work on a circuit board with a laptop and an at-home lab kit.

Explore the best of the South west

Arizona is more than a backdrop — it's **part of the ASU experience**. Whether you're taking a day trip to Sedona with friends or conducting field research in the Grand Canyon with professors, you'll connect with the landscape and draw inspiration from its natural beauty.

Birdie F. hikes Cathedral Rock in Sedona, a 90-minute drive from the Downtown Phoenix campus.

90
minutes to Sedona's red rocks and 3.5 hours to the Grand Canyon.

158
miles to Snowbowl, the alpine ski resort in Arizona's San Francisco Peaks.

24
national parks, monuments and recreational areas in Arizona.

300
sunny days enjoyed by Phoenix residents each year.

75°
average temperature in Phoenix.

Go to class in unexpected places

Want to know what studying abroad really looks like? Imagine spending 10 days in Antarctica studying wildlife patterns, the impact of climate change and health care. ASU offers more than 300 global education experiences. You can spend between one week and one academic year studying in another country, learning from its people and embracing its culture. You'll gain a lifelong global competency that will **prepare you to investigate the world, recognize perspectives, communicate ideas and take action**.

Two ASU students take a polar plunge in Antarctica as part of a study abroad trip led by faculty in the Rob Walton College of Global Futures. The students also hiked a glacier and observed penguins. Students participate in study abroad trips to Antarctica during the winter each year.

ASU BIOS

ASU Bermuda Institute of Ocean Sciences conducts scientific analysis of the ocean to address critical global environmental issues and combines research with distinct teaching facilities to offer students hands-on learning opportunities.

Top study abroad destinations:

Spain
Italy
France
United Kingdom
Japan
Ireland
Germany
Australia
Costa Rica

4,300+
ASU students participate in a global education program each year.

65+
countries offer study abroad experiences.

Make a difference

in your life and in the world

At ASU, you'll have opportunities to **discover what you're passionate about, design the life you envision and explore ways to make an impact** in the world. This means a brighter future for you, your family, your country and the global community.

The university community is guided by the ASU Charter principles: "ASU is a comprehensive public research university, measured not by whom it excludes, but by whom it includes and how they succeed; advancing research and discovery of public value; and assuming fundamental responsibility for the economic, social, cultural and overall health of the communities it serves." **These tenets are the foundation of what attracts students from around the world.**

Help design a better world for everyone

You'll be joining a community of innovative thinkers at ASU — students and professors who are committed to improving the world and all life in it. Guided by a charter that emphasizes caring for our local and global communities, ASU offers you ways to **make a meaningful impact and help create a brighter future for our planet**.

As a student, you'll have opportunities to get involved and start making an impact even before you graduate through research, internships, entrepreneurship, student clubs, volunteering and more. You can **make a tangible difference on issues that are important to the world, and gain experience that will give you an edge on your resume**.

#1 in the U.S. and top 10 in the world for global impact

ASU ahead of MIT and Penn State
— Times Higher Education, 6 years, 2020–25

Cliff Kapono, ASU assistant professor, analytical chemist, surfer and storyteller in the School of Ocean Futures, blends science and Indigenous storytelling to study coral reefs in Hawai'i. Kapono says this holistic approach enables his students to see the bigger picture and empowers them to connect to people and the planet.

Become an Impact Scholar

The Global Futures Impact Scholars program is for first-year undergraduate students rooted in designing solutions for people and the planet. Students are connected with leading scientists and initiatives, are awarded up to $5,000 in funding, and receive mentorship that prepares them for fulfilling careers with purpose.

Turn what you love into what you do

Your interests aren't just hobbies — they're clues to the type of career you'll enjoy and be successful in. ASU offers lots of **opportunities for you to explore what excites you** and can help you **turn something that gives you joy into a meaningful career**. That's why Forbes ranks ASU as one of the **15 Top Colleges For Launching Your Career**.

Leaning on the mentorship of professors throughout her ASU experience, **Cindy B.** became the first in her family to complete college, graduating with a BSE in materials science and engineering. She is now a reticle manufacturing process engineer for Micron Technology.

After gaining experience at ASU as part of the Next Generation Service Corps — ASU's character-based, leadership-driven service academy — **Lorena A.** was elected to the Arizona House of Representatives and was instrumental in helping secure funding for the Arizona Promise Program, which helps Arizona students pay for college.

#2 in the U.S. for employability

among public universities

ASU ahead of UCLA, University of Michigan and Purdue

— Global Employability University Ranking and Survey, 4 years, 2023–26

Lina Washington started her ASU experience in the dance program, but switched her major to broadcast journalism toward the end of her first year. After spending time at news stations in Bakersfield and Sacramento, California, she came home to Phoenix and her dream job as a sports reporter and anchor at 12 News, the Valley's NBC affiliate. Lina says the time she spent at ASU shaped who she is today: **"I'm doing exactly what I envisioned when I was a student in the Cronkite School."**

Gain a competitive edge
in a career-prep ecosystem

The entire ASU student experience is designed as a **career-prep ecosystem**. Everything you do here – leading a club, working part time, playing an intramural sport – helps build the skills that will propel you to an **outstanding career**. And you can gain experience by participating in global internships with international organizations, short-term virtual micro-internships or a success course to help you make the most of your internship experiences.

Meet some students and alumni and see how their journey put them on the path to a bright future.

"The hands-on experience I received at ASU was huge. Many universities aren't as hands-on, and that truly gave me an edge."

Mario C.
Mechanical engineering

Community service project
Formed and worked on an engineering team to develop practical solutions, including designing multi-generational housing concepts.

Honors project
Designed and built custom equipment using 3D printers, saving the physics department thousands of dollars.

On-campus job
Gained practical experience with 3D printing technology while working under the mentorship of physics department faculty.

Intramurals
Participated in rugby and basketball, building leadership, teamwork and communication skills.

Internship
Developed technical expertise in computer-aided design at Elecnor Deimos.

Capstone project
Designed easy-to-assemble emergency shelters, strengthening problem-solving and design skills under real-world constraints.

Career services
Used the ASU CareerLink platform to apply for jobs.

Postgraduation career
Stood out among more than 300 applicants and was hired as an equipment engineer at Taiwan Semiconductor Manufacturing Company two months after graduation.

"I loved ASU because of all the different opportunities that were available to me and because of all the amazing people I met and formed connections with. Choosing ASU is genuinely one of the best decisions I've ever made."

Tia R.
Sports journalism

Professional experience
Built a competitive portfolio through diverse roles, including Phoenix Mercury beat reporter for The IX Basketball, assistant editor for the Walter Cronkite Sports Network, digital sports reporter and sports producer for Cronkite News, sports commentator for Pac-12 Networks and ESPN+, commentator for Cubs Charities, and anchor for Cronkite Noticias – leveraging bilingual Spanish-language skills.

On-campus job
Served as promotions director and assistant sports director for Blaze Radio, developing leadership, broadcast production and on-air hosting experience across multiple radio shows. Also served as a Multicultural Communities of Excellence Ambassador.

Clubs and Greek life
Active member of the Iota Kappa chapter of Delta Sigma Theta Sorority, Inc., the Black Student Union Downtown and the National Association of Black Journalists, gaining leadership experience and strengthening organizational and communication skills.

Internship
Completed a production internship with ESPN in Los Angeles, gaining hands-on experience working on SportsCenter and NBA Today while expanding professional network.

Postgraduation career
Secured a role as a feature writer in the USA Basketball Writing Program before graduation and was hired as a sports reporter for The Clarion-Ledger immediately after graduating in May 2025.

Graduate school plans
Preparing to pursue a master's degree to become a physician assistant.

Work experience
Worked as a medical assistant at Camelback Pediatrics, gaining clinical experience and strengthening communication and empathy when working with patients, families and health care providers.

Volunteer work
Supported the Arizona Science Center's Piece of the Pi educational outreach program, developing skills in fundraising, communication and organizational development.

Internship
Provided compassionate support to patients and families at Hospice of the Valley, gaining hands-on experience in dementia care and strengthening patient-centered communication skills.

Clubs
Participated in the Pre-Health Club and Pre-PA Club, building a strong peer network and gaining leadership experience aligned with health care career goals.

Greek life
Active member of Pi Beta Phi, developing leadership skills through event planning, project management, team dynamics and effective communication.

Student government
Served as director of Student Advocacy and Assistance, gaining experience managing student feedback, solving complex issues and advocating for the well-being of others.

"ASU gives students the autonomy to shape their own experience, empowering us to take initiative, explore interests and design our own path."

Olivia B.
Biomedical science

Top 5 in the U.S. for best co-op and internship programs
among public universities

ASU along with Georgia Tech, Purdue and Clemson
— U.S. News & World Report, 2026

Access career connections that help set you apart

An outstanding career begins with the right network. ASU offers connections to employers from every sector, including **more than 130 Fortune 500 companies**, who recruit and employ ASU grads. Career prep at ASU begins as soon as you arrive. From day one, you'll have access to career mentors, professional networks, internship opportunities, industry partnerships and direct admission into your major — all of which will help you **stand out in the job market**. ASU offers the tools, resources and guidance to ensure you're **prepared no matter how your career takes shape**. For example, as artificial intelligence transforms industries, ASU is making sure students are not just keeping up, but **leading the way**.

1,000+
students supported through Venture Devils.

620+
people employed at ASU-linked startups.

600,000+
members of the ASU alumni network, the largest network in metro Phoenix.

"We have been very pleased with ASU grads, with the skills they bring with them, their tenure — how long they stay with us — and their career progression."
— Senior director, Global Incentive Strategies, Intel

ASU graduates are starting their careers at some of the world's top organizations

- American Airlines
- American Express
- Apple
- Bank of America
- Banner Health
- Boeing
- Charles Schwab
- Dell Technologies
- Deloitte
- Goldman Sachs
- Honeywell
- HonorHealth
- Intel Corporation
- Mayo Clinic
- Microchip Technology
- Microsoft Corporation
- Northrop Grumman
- PepsiCo
- Phoenix Children's Hospital
- Raytheon Technologies
- Taiwan Semiconductor Manufacturing Co.
- Tesla

Live a fulfilling life

The things you'll learn, the community you'll build and the opportunities you'll explore at ASU will **set you up for success**. Our goal is to help you thrive in every aspect of your life, including your health, job satisfaction and community ties.

Happy. Successful. Fulfilled. Living the life they desire – that's what we want for every member of our student and alumni family.

Max Bregman is proof that with a supportive environment, good ideas and the drive to bring them to life, you can reach your goals and m**ake a positive impact in the world.**

As an ASU student, Max – a Flinn Scholar who majored in business data analytics and minored in real estate – challenged himself to make connections and explore opportunities. He founded a club for students dedicated to changing the world, joined ASU's ultimate frisbee team, started a funded founders and investors club, and helped to create Culdesac – **the nation's first car-free neighborhood.**

During his junior year at ASU, Max co-founded BreatheEV, a startup that now operates in 11 states and is revolutionizing electric vehicle charging by connecting drivers with available charging stations. BreatheEV **won almost every pitch competition** that Max entered, including one sponsored by Dubai, and was named one of Arizona's **most innovative businesses** by the Arizona Commerce Authority. Today, BreatheEV is a 12-person team and has already drawn acquisition offers. ASU is an ideal place to network; in fact, Max met BreatheEV's co-founder, Tony, through the Luminosity Lab at ASU.

Beyond his entrepreneurial drive, Max likes to travel, perform magic, work out and stay active, and he believes that the network he gained and the support he received at ASU have enabled him to **pursue a fulfilling life. "I don't think I would have gotten the support and the resources I received from ASU at any other university."**

"I'm driven by wanting to make the world better, and the fastest way to do that is through startups. There are a lot of opportunities ahead."
– Max B.

Jada Gonzales, '14, is a senior technology consultant at Southwest Airlines who holds five Salesforce certifications and leads enterprise-wide Salesforce initiatives. "The lessons I learned at ASU were not just academic – they were about grit. I credit my time at ASU with giving me the ambition and resilience to keep setting bigger goals and the drive to reach them."

Jordan Drake, '22, is CEO of a Texas nonprofit dedicated to serving adults with intellectual and developmental disabilities. With Jordan at the helm, the organization has improved its finances, raised its community profile and increased staff morale. "ASU equipped me to approach challenges with a strategic mindset and innovative solutions. I credit much of my success to the foundation ASU provided."

A place where you belong

If you're starting to picture yourself at ASU, we're here to help you take the next step. Join an Experience ASU tour, where one of our students will show you around campus, share their story and answer your questions. You can also take a virtual tour if you can't make it to campus.

We can't wait for you to join us and to see what you'll accomplish at ASU.

Jadyn O. (left) and Dustin G. pass by **San Tan Hall** on the Polytechnic campus. Located in the East Valley, the Polytechnic campus sits in a scenic desert landscape and offers students plenty of social spaces and a hands-on learning environment. Facilities include advanced labs with access to specialized tools, a crystal-clear lap pool and gym packed with the latest equipment, and residence halls with all the comforts and amenities.

Thank you, Sun Devils

You don't have to love sports to love the fan experience. The ASU gameday atmosphere is **pure passion and fire**. Our student section, the Inferno, **won the Big 12 Student Section of the Week** twice in 2025. But if you enter the Inferno, beware: **it gets loud!**

New ASU students participate in **Sun Devil Welcome** at Mountain America Stadium. Occuring a couple days before the start of fall classes, Sun Devil Welcome is a high-energy event full of spirit, pride and tradition that features the ASU marching band, Sun Devil Athletics, Sparky the Sun Devil, an inspirational address by President Michael Crow and more.

Every student photo in this book features actual ASU students or alumni engaged in real ASU experiences. We're committed to telling a genuine, student-focused story, and we're grateful for the many students who shared theirs.
